Challenge for the better

People's lives are changing with the times – What they need is nothing less than “convenience and simplicity” based on creative efforts.

We, MAJEND MAKCS CO., LTD., support people's “convenient and simple lives” through the development and manufacturing of functional packaging materials which can be used in various areas, such as retort pouches and barrier materials.

We ensure the highest quality with our long-lasting advanced technology, taking the peculiarities of each product into account.

All of our employees are on the same page to provide “convenience and simplicity” as well as “security and safety” to each customer.

We strive to make challenges along with increasing needs, from food, medical, cosmetics, apparel to industrial.

We achieve incomparable and ideal production environments through an uncompromising hygiene management within the factory. Our experts assigned to their specialized process use state-of-the-art equipment in a highly-professional way. "CLEAN, COOL, COZY" - with this keyword, we will keep pursuing the best factory environments producing the best quality.

We promise

Step. 1
Printing

Highly-accurate representation

Our dedicated design team professionally supervises data provided by customers. From pattern fitting with high accuracy, as well as the toning process using our state-of-the-air printing machines (10-color / 8-color), your package design will be vividly realized.

Whenever entering the factory, every person passes through an air shower to receive strong wind from head to foot for anti-dust purposes.

All doors of the factory are automated double- or more interlocking shutter doors.

The factory walls and floors are designed so that all dust can be quickly removed.

Product Materials Control Section. Together with prevent from getting mixed with different sort of material, it will be obviously see of what is being looked for. This is a functional storehouse full with fastness and accuracy.

high standards with excellent quality

Step. 2 Dry Laminator

Step. 3 Aging

Step. 4 Winder

High value-added creation

Our experts customize optimum adhesives according to the applications of the packaging materials. Integrating one function with other functions extends the performance of our products. State-of-the-art machines are provided exclusively for us. Our unique technological skills can be seen in each single process.

Best condition

There are 13 aging rooms, each of which is individually air-conditioned. We ensure the best condition for your products through temperature control suitable for packaging materials and adhesives.

Delicate pursue

We ensure precise quality control meeting the customers' needs through appearance inspections using high-performance cameras. Cutting-edge cameras inspect clear film from one side and non-transparent aluminum film from both sides.

Using our state-of-the-art equipment

Step. 5 Slitter

Step. 6 Bag Making

Step. 7 QC/QA

Flexible high-performance

Our special-function slitter precisely slits products according to their sizes and specifications. It is compatible with various slitting conditions such as length, width, height and whole positions as well as a D-cut and other special functions.

Enhancing readiness

Our factory is equipped with bag making machines having different functions, for example: covering side seals, center seals, three-way seals, etc. We realize a wide range of bags meeting the customers' needs with the best choice from these machines. We promise that we are ready to meet the ever-changing and increasing customers' needs.

Commitment to quality

The key of our quality control is precise data management. We ensure stable quality by performing quality control in each process. At the final process, we perform quality inspections in all aspects based on the customers' requirements, and deliver only products which have passed our strict inspections.

High quality flexible packages for Food and Other applications

Functional packaging materials which can be used in various areas and their applications vary from food, daily commodities, medical and industrial. Functions required for each application can be further diversified. MAJEND MAKCS CO., LTD., as a pioneer in the industry, will meet the changing needs with our advanced technological skills and excellent quality.
